

All Digital Surveillance Consultants systems are custom built to meet the needs of each of our clients. As every surveillance installation presents a unique monitoring scenario, we customize all installations for maximum effectiveness. Utilizing state-of-the-art hardware from name-brand equipment from manufacturers such as Bosch/Phillips, Sony, Samsung, Everfocus, Pelco, CBC America, Geovision & Dell Computer, our surveillance systems are a rock-solid way for you to protect your assets.

All VisionI DVR systems feature remote internet viewing capability with no special, proprietary, remote client software needed. This means you can access your live camera views and audio, 24/7, from anywhere in the world where you have internet access

System Options	
System	System Details
4 Channel Systems	Recording frame rates from 7.5FPS to 30FPS per camera
8 Channel Systems	Recording frame rates from 5FPS to 30FPS per camera
16 Channel Systems	Recording frame rates from 5FPS to 30FPS per camera
32 Channel Systems	Recording frame rates from 2FPS to 30FPS per camera

DVR Choices

We have DVR solutions for every budget, from inexpensive standalone DVR to the most sophisticated PC based on the market.

Camera Choices

VisionI offers a multitude of different styles and types of professional surveillance cameras: From overt to covert; from standard CCD-style box-type cameras to more pleasing and discreet dome-type cameras and visually pleasing bullet-type cameras. Let us know what your preference is and we'll custom design a system that meets your needs and satisfaction.
