

Door Phone

The Norstar Doorphone enables office personnel to talk directly with visitors prior to their entering a business. When a visitor presses the Call Button, the Norstar system rings the designated phone(s) in an office and allows two-way conversation. The optional Door Opening Controller enables any Norstar phone to control a latch on a door or a gate.

Key Features:

- Allows two-way conversation between Norstar phone and Doorphone
- Available in brass or stainless steel, waterproof faceplates
- Has optional Door Opening Controller (DOC), controlled by pressing softkey
- Installed and programmed like any Norstar phone
- Up to four Doorphones accommodated on a Norstar system

Nortel Business Series Terminals T7316E is a full-featured, expandable, multi-line telephone that has a two-line, 16-character-per-line display that is menu driven and supported by three context-sensitive soft keys. The T7316E provides access to 24 memory buttons, 16 of which include multi-segment icons for fast and precise decision making. It is designed for high call volume positions requiring access to extensive system features. Typical users include supervisors, managers, executives, and other business professionals

Key Features:

- **Modular design:** Allows the T7316E to be deployed anywhere as a feature-rich standalone solution; or, by adding the T24 Key Indicator Module, as a Central Answering Position for efficient call routing.
- **Integrated busy lamp field/Direct station select:** Increases customer satisfaction while improving operator efficiency by utilizing multi-segment icons for accurate and efficient routing of customer inquiries.
- **Audio control center:** Simplifies telephone operation by clustering common audio features for fast and precise toggle action between handset, headset, and speaker.
- **Built-in speaker:** Improves communication by providing hands-free audio capability for multi-tasking and group participation.
- **Menu-driven display with soft keys:** Provides users with an intuitive interface for fast and accurate access to system features.

Business Series Terminal T7316E + T24 KIM

Overview

- [Visio Icons](#)

As the M7324+CAP replacement, the Nortel Business Series Terminal Central Answering Position (BST CAP) embodies the same high quality, flexibility and expandability you have come to expect from Nortel. It is ergonomically designed to ensure administrative assistants, receptionists and emergency contact center personnel distribute calls more efficiently. By attaching up to four T24 Key Indicator Modules (KIMs) directly to a T7316E, users can elevate their operations while maintaining

exceptional customer service. The result is an elegant desktop telephone solution ready to transform the pace and efficiency of any business operation while maintaining exceptional customer service standards.

Key Features:

- **Modular design:** Whether functioning as a feature-rich standalone solution or as a Central Answering Position, the BST CAP's modular design allows strategic deployment based on business requirements.
- **System powered:** Reliability is improved and installation simplified by removing the auxiliary power supply and utilizing the Business Communications Manager (BCM) or Norstar system to power the BST CAP.
- **Busy lamp field/Direct station select:** Increases customer satisfaction while improving operator efficiency by utilizing multi-segment icons for accurate and efficient routing of customer inquiries.
- **Audio control center:** Simplifies telephone operation by clustering common audio features for fast and precise toggle action between handset, headset, and speaker.
- **Multiple hunt groups on the T24 Key Indicator Module (KIM):** Ensures real-time contact by providing a series of telephone lines organized in such a way that if the first line is busy, the next line is hunted until a free line is found.
